EDUCATION

SRM University

Bachelor of Technology in Computer Science and Engineering; **CGPA: 8.69/10.0**

Neerukonda, AP

Aug 2023 – May 2027

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Database Management Systems, Operating Systems, Computer Networks, Object Oriented Programming.

EXPERIENCE

MKS Vision Private Limited

Software Engineering Intern (Summer)

Hyderabad, India

Jun 2025 – Jul 2025

- Engineered a high-performance GUI-based PDF annotation tool leveraging **YOLOv8** for real-time object detection and automated label extraction.
- Streamlined the data labeling pipeline by implementing page-wise detection and automated YOLO-format exports, reducing manual annotation time by approximately 40%.
- Integrated custom model training workflows allowing for seamless inference on specialized document datasets.

PUBLICATIONS

Stacked Deep Learning Models with YOLOv8 for Automated Brain Tumor Analysis

Dec 2025

- Published and presented at the **17th IEEE International Conference on Computational Intelligence and Communication Networks (CICN-2025)**, NIT Goa.
- Proposed a stacked deep learning pipeline integrating **YOLOv8** for accurate brain tumor detection and localization from medical imaging data.
- Demonstrated improved diagnostic performance through model ensembling and optimized preprocessing workflows.

PROJECTS

Music Recommendation System | FastAPI, SentenceTransformers, Scikit-learn

Oct 2025

- Architected an end-to-end recommendation engine using **Cosine Similarity** on metadata and high-dimensional lyric embeddings.
- Deployed a scalable **FastAPI** backend for low-latency inference, utilizing **Joblib** for model serialization and rapid state loading.
- Designed a responsive UI with features like genre filtering and autocomplete, enhancing user engagement and discovery.

Heart Attack Prediction Model | Python, Scikit-learn, Random Forest

Jun 2025

- Developed a diagnostic ML model achieving **94% precision** using an optimized Random Forest classifier to predict cardiac risks.
- Performed rigorous Exploratory Data Analysis (EDA) and feature engineering using Pandas and Seaborn to identify key medical correlations.
- Evaluated and benchmarked model performance against SVM, Naive Bayes, and Gradient Boosting to ensure maximum reliability.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, JavaScript, PHP, HTML/CSS

Frameworks & Libraries: FastAPI, LangChain, NumPy, Pandas, Scikit-learn, OpenCV, YOLOv8, Matplotlib, Seaborn, Langchain, RAG

Core Competencies: Machine Learning, Deep Learning (CNN, RNN, Transformers), NLP, Data Structures & Algorithms, DBMS, Operating Systems

Tools: Git, GitHub, VS Code, Jupyter Notebook, Linux Terminal

ACHIEVEMENTS

Competitive Programming: Solved **260+** problems across LeetCode and GFG; 5-Star C++ Developer on HackerRank.

Soft Skills: Leadership, Problem Solving, Technical Writing, Collaborative Teamwork.
